WELCOME

Geachte Jarltech partner,

Hier is hij dan! Uw persoonlijke exemplaar van de Jarltech catalogus. In deze editie vindt u de nieuwste en meest populaire producten van toonaangevende merken in de POS en Auto-ID industrie. Met een beetje trots presenteer ik dan ook onze nieuwe catalogus: dankzij de steeds nauwere relaties met onze leveranciers, is deze catalogus nog actueler dan ooit!

De sleutel tot succes is een sterke basis, blijf daarom op de expertise van Jarltech vertrouwen. Ons business model is op u, als wederverkoper, gericht en onze vertegenwoordigers helpen u dan ook graag met al uw (aan)vragen. Daarnaast kunt u ook vertrouwen op onze enorme voorraad, die u helpt bij het besparen op magazijnkosten.

Om volledig te profiteren van alle voordelen van Jarltech, heeft u slechts drie dingen nodig: het telefoonnummer van uw persoonlijke contactpersoon, uw inloggegevens voor de Jarltech webshop, en deze catalogus. In deze catalogus vindt u de meest vooraanstaande producten uit onze portfolio. Uw voordeel: Jarltech distribueert al meer dan 20 jaar hardware van toonaangevende merken in de Kassa en Auto-ID industrie - u kunt dus vertrouwen op onze expertise.

Blijf gebruik maken van de toegevoegde waarde van Jarltech en profiteer van onze extra services die wij soms zelfs kosteloos aanbieden. In onze online shop vindt u alle beschikbare hardware varianten, actuele prijzen en voorraden. Op de Jarltech website ontdekt u veel aantrekkelijke aanbiedingen, evenals de meest populaire producten en zakelijk nieuws op het gebied van Auto-ID en POS. Indien u bent ingelogd kunt u uw bestellingen eenvoudig verwerken onder »Mijn Account«, ook kunt u zaken als afleveradressen, verschillende services en RMA's beheren.

Lees meer over Jarltech, onze partners, producten en interessante gebeurtenissen op **www.facebook.com/Jarltech** en volg ons op Twitter!

Met vriendelijke groet,

Ulrich Spranger (General Manager)
ulrich.spranger@jarltech.com

PS: Heeft u de nieuwe Jarltech AIDC / POS Showroom en Training Centre al bezocht? Nee?! Dan kunt u op de volgende pagina's zien wat u te wachten staat: een groot assortiment aan producten van toonaangevende leveranciers die voor u staan opgesteld om te testen en te vergelijken. Bezoek onze showroom kosteloos en vrijblijvend, wanneer het u uitkomt. Meer informatie op pagina 18/19!

Epson Service Center

Know-how bij

SUPPORT & REPARATIES

Technische support: Technische ondersteuning is via ons telefoonnummer **(0800) JARLTECH** altijd geheel gratis. Onze support medewerkers worden regelmatig opgeleid en bijgeschoold door onze fabrikanten om het kennisniveau optimaal te houden. Wij ondersteunen u graag bij vragen over het installeren en aansluiten van onze hardware. Op **www.jarltech.nl** vindt u onze uitgebreide support pagina met allerlei belangrijke zaken die u kunt downloaden zoals drivers, handleidingen, installatieprogramma's, maar ook praktische tips voor de verschillende apparaten.

Reparaties en garantiegevallen: Alle binnenkomende garantiegevallen behandelen wij nog dezelfde dag. Indien wij het probleem zelf kunnen constateren wordt het apparaat zo spoedig mogelijk bij ons in huis gerepareerd of doorgestuurd aan de fabrikant. Wij zijn onder andere onderdeel van het Epson Service Center en voeren garantie reparaties zelf uit. Hierdoor zijn wij sneller en vakkundiger dan andere distributeurs die hun producten voor reparatie naar de fabrikant moeten versturen.

Onderdelen service: Wij leveren meer dan honderdduizend onderdelen van verschillende fabrikanten. Wij zijn onder andere officiële leverancier van onderdelen voor de POS printers van Epson, Citizen, Metapace, Honeywell en Datalogic barcodescanners, alsook voor de Zebra etiketten printers. Op de supportpagina van onze website vindt u van veel producten de exploded diagrams, waarin u het kleinste schroefje of nippeltje kan vinden en eenvoudig kan bestellen.

Configuratie – kort & bondig:

PC configuratie
Wij installeren het besturingssysteem in elke gewenste taal

Software installatie
Tegelijkertijd installeren wij uw software aan de hand van uw voorbeeld harddisk

Hardware configuratie
Wij configureren DIP-switches en instellingen volgens uw specificaties

Product individualisering
Aangepaste labels toevoegen met speciale instructies voor de gebruiker, enz.

Werking en burn-in test
Op uw verzoek kunnen wij de hardware uitgebreid testen voordat het naar u of uw klant verzonden wordt

Configuratie en INSTALLATIE SERVICE

Met de hulp van Jarltech kan de stress die een installatie kan veroorzaken bij grote projecten enorm worden gereduceerd. Op uw verzoek installeren en configureren wij systemen, PC's en andere apparaten voordat wij hen naar u of direct naar uw klant(en) versturen. Dit kan de installatie zijn van uw eigen logo's, uw POS software op een kassasysteem, alsook eventueel het voorzien van apparaten zoals printers of scanners met uw eigen naam. Ook de configuratie van Windows CE op handheld apparaten of de reguliere installatie van Windows op een PC. Uw technici hoeven geen uren meer te besteden aan de configuratie van systemen- en of apparaten. Wat zij enkel nog moeten doen is het plaatsen en aansluiten van de systemen en apparaten op de gewenste locatie. Vooral bij grote bestellingen kan onze configuratie en installatie service u enorm veel tijd en personeels-kosten besparen.

Bovendien geeft Jarltech u en uw klanten de garantie dat de aangeschafte systemen naar behoren werken. De apparaten worden tijdens de configuratie gelijktijdig onder-zocht op mogelijke defecten en- of beschadigingen. Deze defecte apparaten worden er natuurlijk onmiddellijk tussenuit gehaald. Wij geven u graag meer informatie over hoe wij uw efficiëntie kunnen verhogen. Neem simpelweg contact op met uw persoonlijke Jarltech vertegenwoordiger.

Bonusshop – kort & bondig:

Met iedere euro omzet bonuspunten sparen
Kosteloos voor alle Jarltech dealers

Gigantische geschenkenwinkel met te gekke geschenken
Meer dan 1200 geschenken, van een simpele CD tot een complete vliegreis

Voor de eigenaar, inkoper en collega's
Jarltech betaalt alle loonbelasting over deze geschenken

Automatisch punten sparen bij elke bestelling
Voor alle geregistreerde deelnemers

Punten sparen voor grote prijzen
Uw punten vervallen niet bij regelmatige afname

Voor u en uw firma

BONUS GESCHENKEN

Als deelnemer van het Jarltech bonusprogramma krijgt u voor iedere euro netto omzet automatisch een punt bijgeschreven, welke in de bonusshop kan worden gebruikt om aantrekkelijke geschenken te »kopen«. Meld u aan voor het bonus systeem op **www.jarltech.nl** – Dit is binnen een minuut gerealiseerd. Uw actuele puntenstand kunt u altijd online via uw account in de Jarltech bonusshop opvragen. Alle punten op uw rekening zijn vanaf de laatste aankoop één jaar geldig. Pas twaalf maanden na uw laatste omzet komen de punten op uw rekening te vervallen.

In onze bonusshop koopt u net als in iedere andere webshop in– u kunt hier echter met punten betalen, in plaats van geld. Wij leveren de gekozen geschenken kosteloos naar ieder adres in Nederland, België of Luxemburg. De geschenken in de bonusshop veranderen steeds, daarom kan een snelle keuze wel eens verstandig zijn. Wij vragen uw begrip voor het feit dat u voor sommige geschenken rekening moet houden met een levertijd. Om een qua kosten voordelige verwerking te waarborgen, beantwoorden wij uw vragen ook graag per e-mail. Neem contact op met **bonus@jarltech.nl**.

Jarltech betaalt alle belastingen voor uw bonus geschenk. Dit betekent dat u het kado niet hoeft te boeken als gift. Alle klanten van Jarltech, die een rekening of leveringsadres in Nederland, België of Luxemburg hebben kunnen deelnemen. De deelnemer is altijd het bedrijf. Dat betekent dat er maximaal één bonus-rekening per bedrijf bestaat. De punten gelden alleen voor het ingeschreven bedrijf. Verkregen bonus punten zijn niet inwisselbaar voor geld en kunnen niet worden overgenomen door derden.

VIP – kort & bondig:

VIP worden door het verzamelen van punten
20.000 punten voor zilveren- en 50.000 voor gouden-VIP

Porto vrije leveringen
Voor zilveren-VIPs vanaf 1000 euro, voor gouden-VIPs vanaf 600 euro

Bijzonder gunstige inkoopprijzen
Speciale en altijd de voordeligste prijsstaffels

Bevoorrechte positie bij het toewijzen van goederen
Voor gouden- en zilveren-VIPs

Deelname aan technische scholingen
Kostenloos volledig naar uw behoefte voor gouden- en zilveren-VIPs

VIP korting van 15 procent op express leveringen

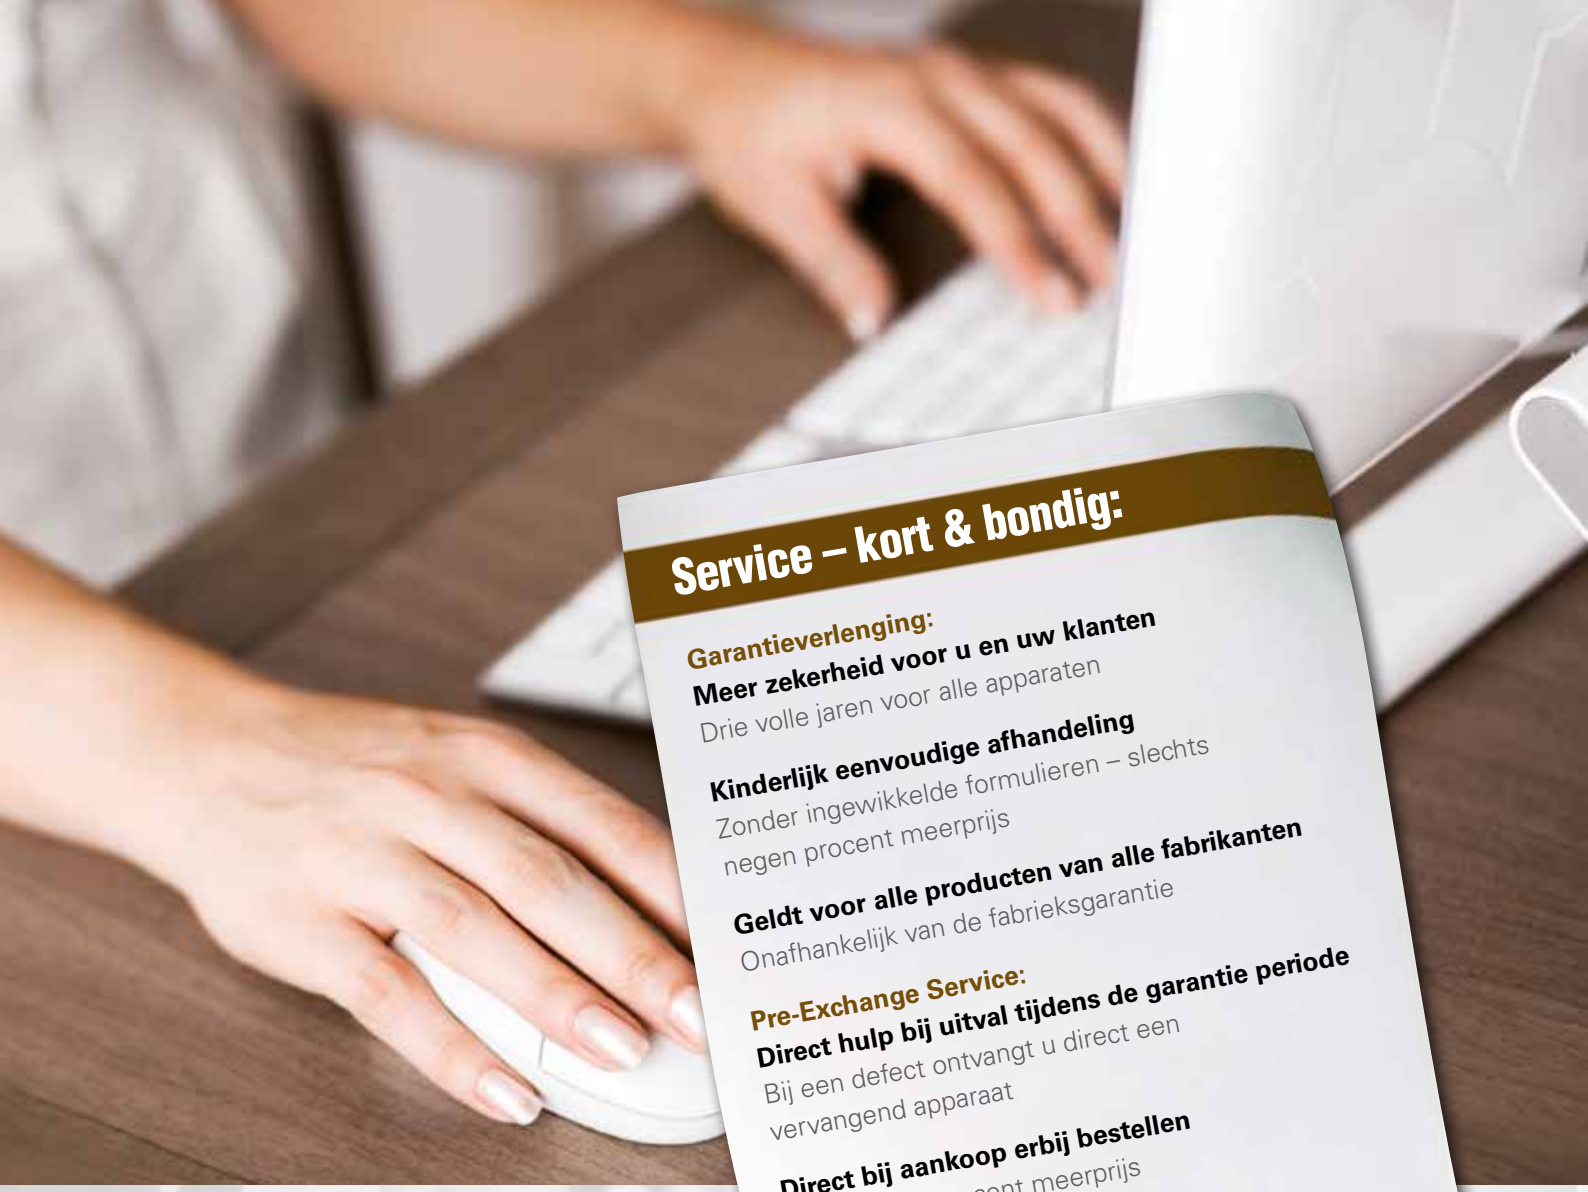
Exclusieve voordelen als JARLTECH-VIP

VIP wordt u bij Jarltech met bonuspunten: vanaf 20.000 punten per jaar bent u een Zilveren VIP en vanaf 50.000 punten per jaar geniet u van de voordelen van een Gouden VIP.

Uw voordelen als zilveren-VIP: Voor het behalen van deze zilveren status ontvangt u automatisch 2.000 welkomstpunten op uw account. Naast portovrije leveringen binnen Nederland, België en Luxemburg vanaf 1000 euro goederenwaarde (m.u.v. express), behoort u meteen tot een geselecteerde groep van klanten die deelnemen aan speciale promoties (kits, bundels, aanbiedingen) voor afzonderlijke artikelen heeft u de mogelijkheid om extra punten te verzamelen. Wij bieden daar bovenop ook nog een Dead-On-Arrival service, alsook een kosteloze deelname aan opleidingen voor technici in ons bedrijf.

Uw voordelen als gouden-VIP: Met het bereiken van de gouden status, behoudt u vanzelfsprekend uw voordelen die u als zilveren-VIP behaald heeft. Echter u ontvangt voor het behalen van de gouden-VIP status 5.000 welkomstpunten en portvrije leveringen (m.u.v. express) binnen Nederland, België en Luxemburg vanaf 600 euro goederenwaarde. Ook ontvangt u 25 procent meer bonus punten dan andere leden.

Natuurlijk wordt u ook in de watten gelegd als het gaat om uw prijsberekening, als gouden- of zilveren-VIP geniet u altijd van de voordeligste VIP prijsstaffels. Daarbovenop ontvangt u een VIP korting van 15 procent op express leveringen.



Service – kort & bondig:

Garantieverlenging:

Meer zekerheid voor u en uw klanten
Drie volle jaren voor alle apparaten

Kinderlijk eenvoudige afhandeling
Zonder ingewikkelde formulieren – slechts negen procent meerprijs

Geldt voor alle producten van alle fabrikanten
Onafhankelijk van de fabrieksgarantie

Pre-Exchange Service:

Direct hulp bij uitval tijdens de garantie periode
Bij een defect ontvangt u direct een vervangend apparaat

Direct bij aankoop erbij bestellen
Slechts acht procent meerprijs

Ook te combineren
Pre-Exchange Service en garantieverlenging

Zeker zonder stress:

EÉN-KLIK-SERVICEOVEREENKOMSTEN

Koop zekerheid voor uzelf en uw klanten tegen slechts een paar euro meerprijs! Onze één-klik-serviceovereenkomsten bestelt u op het internet met één klik of per telefoon, eenvoudig en ongecompliceerd bij ieder product, zonder het invullen van omslachtige (aanvraag) formulieren. Bestel gelijktijdig bij het kopen van uw hardware een van de volgende twee serviceopties:

Garantieverlenging: Verleng de garantie van de fabrikant voor vrijwel alle producten uit onze catalogus naar drie jaar volledige garantie. Deze service kost eenmalig negen procent van de prijs van het product, onafhankelijk van de fabrieksgarantie van dat product. Deze garantieverlenging kan gecombineerd worden met de pre-exchange service.

Pre-Exchange Service: Valt een met deze optie gekocht product tijdens de garantieperiode van de fabrikant of de bij ons aangeschafte verlengde garantieperiode uit, dan is uw telefoontje bij ons al voldoende! Wij sturen direct een reserveproduct naar uw adres, of indien gewenst, direct naar uw klanten. Pas na ontvangst retourneert u het defecte product aan ons, dit binnen 10 dagen. Het reserveproduct houdt u gewoon, deze hoeft niet meer vervangen te worden. Deze service kost eenmalig acht procent van de prijs van het product. Deze service is geldig gedurende de gehele garantieperiode zelfs als deze verlengd is.

Casco Garantie – kort & bondig:

Gedurende drie jaar volledige dekking voor uw klant
De Volledige Casco Garantie geeft op alle hardware schadevergoeding, zelfs schade die normaal niet wordt gedekt door de garantie van de fabrikant

Verlengt de garantie tot drie jaar
Garantie van alle hardware wordt verlengd tot drie jaar

Maximale investeringsbescherming voor uw klant
Geen onverwachte kosten voor reparatie of vervanging

Voor alle producten van alle fabrikanten
Ongeacht de oorspronkelijke fabrieksgarantie

Eenvoudig te bestellen!
Gewoon de Volledige Casco Garantie toevoegen aan uw bestelling via de telefoon of het internet voor slechts 18 procent meerprijs

Altijd aan de veilige kant –

VOLLEDIGE CASCO GARANTIE

Jarltech geeft u de mogelijkheid om uw klanten interessante diensten te bieden, die hen bescherming bieden tegen defecten die niet onder de garantie van de fabrikant vallen. Ongeacht of het probleem is veroorzaakt tengevolge van onvoorzichtigheid, uitzonderlijk intensief gebruik, nalatigheid of ongetraind personeel. Met onze Volledige Casco Garantie, behoren hoge onderhoudskosten of onverwachte onderhoudskosten van hardware tot het verleden. Tegen een extra betaling van 18 procent, ontvangt u een »all inclusive« service pakket van Jarltech. Als een apparaat niet meer werkt zoals het hoort te werken gedurende de eerste drie jaar na aankoop, ongeacht de oorzaak, repareren wij het apparaat of het wordt vervangen door een gelijkwaardig apparaat. Dit zonder tijdrovend papierwerk, discussies en/of onderzoeken.

Het voordeel voor uw klant is duidelijk: Hoewel de initiële kosten hoger zijn, zijn gedurende de gehele garantieperiode onverwachte kosten van hardwaredefecten uitgesloten. Op langere termijn, is de investering gewaarborgd en uw klant is altijd verzekerd van vervanging van zijn defecte hardware.

De Volledige Casco Garantie is beschikbaar voor alle producten met een prijs van 150 euro of meer. Alleen slijtbare onderdelen zoals inktlinten, printkoppen, enz. zijn uitgesloten van de garantie. Echter, alle schades die niet zijn veroorzaakt door vandalisme, brand of opzettelijke vernieling, vallen onder deze garantie. Inbegrepen in dit pakket is een garantie verlenging tot drie jaar en de dekking van alle schades die niet gedekt worden door de oorspronkelijke fabrieksgarantie.

Demo – kort & bondig:

Wij stellen u vrijblijvend een demo leenapparaat ter beschikking
Gebruik onze demo hardware voor uw presentaties

Om het aan uw klanten te kunnen demonstreren
Overtuig uw klanten met tastbare verkoopargumenten

Om uw software eenvoudiger te kunnen aanpassen
Als referentie apparaat voor uw programmeur

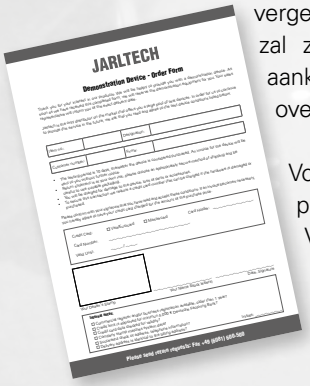
Talloze apparaten 10 dagen op proef
Vraag het aan uw vertegenwoordiger van ons bedrijf

Grote keuze en korte wachttijden
Bijna ieder apparaat uit onze catalogus is snel als demo leverbaar

Speciaal voor u:

DEMO APPARATUUR OM TE TESTEN EN TE GEBRUIKEN VOOR PRESENTATIES

Overtuig uw klanten van de eigenschappen van uw product en presenteer het ter plaatse aan uw klant! Een demonstratie bij uw klant heeft veel meer effect dan het tonen van brochures of foto's van de apparaten. Op deze manier kan de klant het apparaat zelf testen, beoordelen en makkelijker vergelijken met andere apparaten. De klant zal zo een betere en meer gefundeerde aankoopbeslissing nemen met een langdurig overtuigd gevoel.



JARLTECH

Demonstration Device - Order Form

Voor het demonstreren ontvangt u de producten 10 dagen vrijblijvend op zicht. Van bijna ieder product uit onze catalogus zijn één of meerdere exemplaren als demo-hardware beschikbaar. Kies de hardware die bij u past en wij sturen u de producten vrijblijvend toe. De meeste demo producten zijn gratis, voor een aantal apparaten betaalt u een kleine vergoeding, welke verrekend wordt bij de aankoop van het product. Om uw software aan te passen aan de hardware van de verschillende fabrikanten hoeft u geen extra producten aan te schaffen.

In plaats daarvan vindt u bijna al onze producten in de Jarltech demo pool. Gelieve hierover contact op te nemen met uw contactpersoon op onze verkoopafdeling. Om er voor te zorgen dat de presentatie bij uw klant op tijd kan beginnen en er geen vertragingen worden opgelopen door de aanpassing van de software, dient u het testproduct tijdig op te vragen. Voor sommige producten geldt een wachttijd van één tot vier weken.

Marketing – kort & bondig:

Rechtstreekse bezorging met uw eigen pakbon
Stuur ons uw eigen ontwerp van de pakbon en wij leveren rechtstreeks aan uw klanten met uw eigen layout

Geïndividualiseerde en neutrale catalogus
Onze laatste cat alogus met alle producten zonder enige verwijzing naar Jarltech

E-mail service
Onze online tool helpt u bij het maken van professionele e-mails in een paar stappen

Ondersteuning van evenementen en seminars
Evenementen support van Jarltech en onze fabrikanten

Product video's
Gebruik de product video's uit onze online bibliotheek in uw presentaties

Overtuigende competentie: MARKETING DIENSTEN

Maak als Jarltech partner meer winst door het gebruik van onze uitgebreide marketing diensten! Met onze marketing diensten,bieden wij u gratis of tegen kostprijs meer mogelijkheden om uw omzet te kunnen verhogen. Onze jarenlange ervaring in de reclame, productie en POS / Auto-ID marketing is een garantie voor een professioneel en effectief resultaat.

Als klant van Jarltech kunt u er gebruik van maken om uw bestellingen snel en zonder problemen rechtstreeks naar uw klanten te laten verzenden. Op verzoek, kunnen wij de pakbonnen die met de leveringen van de goederen meegezonden worden op **uw »eigen« pakbon** papier afdrukken! Om gebruik te maken van deze dienst dient u uw pakbon layout als PDF per email aan ons te verzenden. Ook is het mogelijk dat wij uw eigen logo met adresgegevens op de pakbon plaatsen.

Verder hebben wij voor alle wederverkopers een neutrale PDF versie van onze nieuwste catalogus zonder Jarltech logo beschikbaar – uiteraard gratis. De complete presentaties van onze producten zijn nu volledig beschikbaar voor u, zonder een enkel spoor van Jarltech. Wij kunnen ook **een eigen catalogus voor u** maken, welke is gebaseerd op de Jarltech catalogus – afgestemd op uw individuele wensen, als PDF bestand, print ontwerp, of zelfs afgedrukt en verpakt.

Daarnaast bieden wij u onze handige **e-mailing tool**, die u helpt om onze teksten en- of afbeeldingen te kopiëren en te plakken in uw eigen e-mails, die u vervolgens direct naar uw klantenbestand kunt verzenden met een druk op de knop.

JARLTECH INSIGHTS

Jarltech – still moving forward

With establishments on three continents and a total of 24 offices, Jarltech is one of the big international specialist distributors for POS and Auto-ID. Jarltech offers a broad portfolio of leading brand name vendors, and uses a business model that is fully aligned to the needs of resellers. This includes our own warranty services, delivery from stock, marketing support and numerous online services.

The strategic marketing decisions from 2012 have fully paid out for Jarltech. The growing market in China contributes significantly to sales increases, and also in Europe and MENA the growth rates are still well into double digits. The continued growth and success confirm the customer-oriented concept of Jarltech.

Jarltech celebrates in Poland

Five years of Jarltech, five years for you on-site: in 2013, Jarltech celebrates in Poland again a little anniversary. Hundreds of customers in Poland have trusted the products and services from Jarltech for the past five years. Gifts are plentiful: local customers benefit all year from numerous anniversary offers and special conditions as a thank you for their loyalty. We say: keep it up!

»We thank our customers for their trust. With the promotions and special prices, we want to give something back to them. Here is to the next five years!« (Ulrich Spranger, CEO)

New catalogue: all in Chinese

Why should a successful project not be expanded upon? Exactly, there is nothing that speaks against the idea. Seeing what a success the Jarltech catalogues in Europe, the Middle East and in North Africa are, while also being a unique item in the industry in printed form, Jarltech decided to also produce a Chinese version of the catalogue. Review of the first edition: in China the catalogue is extremely popular, thus resulting in the production of a second edition mid-year in 2013, entirely in Chinese. What a great job by our Chinese colleagues!

In stock: centralised, yet local

In order to deliver the majority of orders more quickly, Jarltech has set up big warehouses in both China and Dubai. Many of the current top sellers are in stock there in large numbers, so most orders in these regions are filled directly from stock. When equipping them, Jarltech has made no compromises: the successful hardware concept of the European central warehouse, with the rugged tablet PCs of our vendor Getac, ensures for smooth processes from the outset and for efficient warehousing.

Done: up-to-date logistics

Acting for the benefit of our customers – at Jarltech this is the guiding principle. With increasing speed in the IT industry and emerging markets, the demands on logistics are increasing in the background. With two new buildings, as well as the restructuring of goods receipt and shipping, we have created an additional basis for steady growth. The result: significantly increased capacity, greater stock, shorter distances and the resulting shorter processing times – all in the interest of our customers.

Inside the building that also houses the international Jarltech AIDC/POS Showroom and Training Centre, many additional offices provide even more space. Several departments moved in completely, and there is also still plenty of expansion potential for future developments available everywhere.

JARLTECH EUROPEAN AIDC/POS

Hardware you can touch!

Welcome to Europe‘s largest permanent exhibition for POS and Auto-ID, which is always open for you. Ten of the leading vendors present nearly their entire portfolio here. Have a look at and test POS systems, barcode scanners, printers and handheld terminals over an area of several hundred square metres. Overall, there are hundreds of devices – most of them connected, configured, and fully operational – from barcode scanners to large-scale IDS displays.

Test, compare, present: one visit is all it takes

Take advantage of the opportunity on-site for live testing and direct comparisons between different products and manufacturers. Thanks to the excellent relationships with our suppliers and partners this also usually applies to market newcomers. Thus, we ensure that the Showroom is always up to date.

The integrated Training Centre next door also has space for your own employee and customer events. Meeting and training rooms of various sizes make your organisation easy. You only need to make the invitations yourself.

Whether you come alone or with your customers: scheduling flexibility, knowledgeable staff and a lot of attention are guaranteed. Just talk to your sales representative to schedule a personal appointment.

DATALOGIC Honeywell METAPACE EPSON EXCEED YOUR VISION CITIZEN

SHOWROOM AND TRAINING CENTRE

Compare

Test and compare hundreds of devices on-site from the top vendors with each other – appointments are absolutely flexible.

Sit back

Take advantage of the comfortable Jarltech pick-up service from the airport or train station in Frankfurt for you and your customers – in half an hour you are here.

Host

Come over with your customers, too. In the adjoined Training Centre, there is also plenty of space for your own customer events and training sessions.

JARLTECH INSIGHTS

Too many cooks ...

spoil the broth, as the saying goes. On the contrary: porridge recipes are fortunately not to be found in the Jarltech cookbook. Plus, the team effort for recipe collection is a real success. The cookbook is filled with recipes from around the world, cooked and presented by Jarltech employees from around the world. From well-known classics to exotic secrets, everything is included. Convince yourself of the quality offered by Jarltech in this area, too. The good news: all gourmets can already look forward to more volumes!

You do not have a copy of the Jarltech cookbook? Then simply call your service representative!

JARLTECH

More comfort for you with »My Account«

As a Jarltech customer, you can be your own administrator.

Under the menu item »My Account«, you will find various services at your disposal: track your current orders, monitor your delivery and billing addresses and create RMAs simply and quickly.

In addition, you have direct access to exclusive offers, the Jarltech newsletter and our marketing services – all at one glance!

For further questions, speak with your Jarltech representative.

www.jarltech.com

SPECIAL EVENTS

Networking in the best of company

What is the most important thing in a business relationship? Correct, communication. For this reason Jarltech has established the »Networking Dinner«. The idea came into being during a relaxed and informal evening with our vendors after a Jarltech kick-off. At that time we could not know what resounding success this idea would have. Now, the leading vendors in the industry, our customers and Jarltech employees from the entire EMEA region look forward to this event that takes place twice a year in Frankfurt am Main, during which communication with our partners is the focus.

The relaxed lounge atmosphere in the Mantis Roofgarden is the ideal setting for more in-depth discussions, for maintaining business contacts, and often for developing new ideas. In addition to the exquisite barbecue buffet, refreshing cocktails, excellent live music and a view of the Frankfurt skyline, guests can expect a surprise at every event. Whether it is a raffle, prominent close-up magician, or a slot car circuit, there is something for everyone's taste.

We are looking forward to the next »Jarltech Networking Dinner«.

Full house

Live music

Casual conversation

Strong commitment: from Jarltech customer to VIP visitor

Jarltech customers were witnesses of a terrific mood as VIP guests at the exclusive Depeche Mode concert in the Frankfurt Commerzbank Arena. »How to see Depeche Mode« was the motto of this large-scale campaign, which Jarltech and Datalogic started together.

The most successful customers could get excited about receiving the VIP concert tickets – with all the trimmings: luxury seats in the Jarltech box, wonderful catering, champagne and, of course, a unique concert experience. The next place winners of new iPads have also earned their prize. And all the winners are evidence that commitment is certainly worthwhile.

TEAM PLAYER FOR SUCCESSFUL BUSINESSES

EPSON TM-T20 – THE RETAIL AND HOSPITALITY PRINTER

The Epson TM-T20 thermal receipt printer offers excellent value for money and outstanding reliability – our contribution towards ensuring that your clients receive the service they expect.

Benefit from its strengths for your success:

- All-in-one-box concept: comprehensive supply kit including connecting cables, power cable and wall-hanging bracket, CD with drivers, utilities and User's manual
- Integrated power supply
- 80 mm or 58 mm paper width
- High speed: 150 mm/sec
- Exceptional print quality for texts, graphics and logos
- Easy to use
- Very compact and versatile placement options: wall mounted, fitted or integrated

EPSON®
EXCEED YOUR VISION

EPSON®

EXCEED YOUR VISION

Using Epson POS printers, you avoid problems at the point-of-sale and upsetting your customers. No other manufacturer has a similar in-depth understanding of receipt printers, no other has a worldwide market share nearly as large.

Jarltech is long-standing official Epson partner and today is the largest distributor in the entire German-speaking Europe. We have 2,000 POS printers of the most diverse kinds ready from stock. Even rare printer and connection types will be delivered to you the next day. It goes without saying that you receive from us original spare parts and suitable accessories, as well as consumables, e.g. receipt rolls, colour ribbons, or cables recommended by Epson.

Our size is your purchasing advantage: due to our huge purchasing quantities, we can always offer Epson POS printers at best prices, no matter whether you order only one, a hundred, or a thousand units. Besides that, Epson offers you a uniquely vast selection: the range of supplied POS printers stretches from printers designed for simple applications all the way to high performance equipment for the wholesale trade, such as two-colour thermal POS printers or mobile special printers.

Epson offers you the security of a prestigious big enterprise: it is not without reason that statistically, every second store in the world prints on an Epson POS printer. Technical competence paired with uncompromising reliability on behalf of the Japanese manufacturer is reflected in every single detail of the POS printers. This fact is confirmed by impressively low failure rates during long-term laboratory testing, as well as by many years of practical, real-life experience.

By the way: the vast majority of the printers allow subsequent replacement of the interface. That makes it possible to turn a serial printer in no time and at minimal costs for instance into a WLAN or USB printer, which once again increases the investment security for you and your clients.

IT PAYS TO THINK GREEN

SET A NEW BENCHMARK FOR RECEIPT PRINTING

Go greener with the world's first ENERGY STAR® qualified thermal receipt printer. The Epson TM-T88V uses less than 1W of power on standby and saves paper while you print, thanks to the unique margin and line space reduction. And there's no compromise on quality, speed or reliability. This is Epson's first grey scale graphic printer, with fast printing of up to 300 mm a second, a double interface and a standard 4 year warranty. So it's easy to be green and save money, now and for the future.

For a greener future visit www.epson.co.uk

GUARANTEE 4 YEAR

EPSON®
EXCEED YOUR VISION

EPSON®
EXCEED YOUR VISION

Epson TM-T88V

- **The best-selling receipt printer in the world – now even faster**
- **Prints 80 mm and 58 mm wide receipts and vouchers at up to 300 mm/sec.**
- **Professional tool for receipt optimisation (integrated as standard)**
- **Perfect quality of logos and graphics through professional greyscale printing**
- **All-in-one package: includes USB on-board, test roll, switch and cable cover, and spacer**

With over five million installed systems, the TM-T88 from Epson is among the most successful thermal POS printers of all time in the world. The newest edition TM-88V continues this trend: at up to 300 mm/sec., it is not only 50% faster than its predecessor, but also convinces through improved tools, better hardware performance, intelligent features, first-class equipment and a four year warranty. With the newest version, receipts are printed in top quality (7 dots/mm, 180 dpi) and are perfectly optimised. Paper and power consumption are reduced to a minimum, which is authenticated in the TM-T88V by the Energy-Star certification – an absolute premier in the POS market.

The direct thermal printer creates 80 mm and 58 mm wide receipts in fractions of a second and delivers almost unsurpassed quality to the POS area. Logos, graphics and images are now printed in greyscale – coupons, vouchers and rebate promotions are thus printed not only professionally but also become absolute eye-catchers. Unpopular streaking (only when using the RS232 interface) is avoided with the automatic speed adjustment feature, while efficient and low-consuming design of receipts is made simple with the help of diverse tools: automatic receipt reduction, a space optimiser that scales the contents without adjusting the font sizes, and the intelligent logo preprint, in particular to print adjacent to the edge, are all decisive advantages for saving energy and material.

The all-round carefree package of accessories and equipment is absolutely convincing: test roll, switch and cable covers, spacer for 56 mm wide rolls and a power supply including power cord (only with kit versions) are already included with the thermal printer. As standard, each TM-T88V is now equipped with a USB interface. Or choose the optional Ethernet interface for even faster data transfer. However, if these are not needed, Epson offers diverse system interfaces that can be exchanged later, ensuring the necessary flexibility and investment security.

The enormous reliability of its predecessor has been once again significantly improved through better performance. An MCBF of 70 million lines, an auto-cutter that now guarantees over two million clean cuts, and an unrivalled printhead with 150 km – all these features reflect the sustainability of the lengthy four-year warranty period. Proven characteristics, such as easy exchange of the paper roll using the »Drop-In« method, are of course maintained. Function and performance are continually refined and cable guidance improved, whereby a clean appearance is always ensured. The result is a device that is impervious to splash water and whose clear, modern appearance will delight for many years.

The Epson TM-T88V was the first of any thermal receipt printer in the world to be authenticated by the Energy-Star certification for energy saving office equipment. Its energy consumption is extremely low in every operating status: in stand-by operation, it consumes less than 1 Watt. Overall, Epson was able to reduce energy consumption by 14 percent.

The fast, Epson-neutral driver installation and sophisticated remote maintenance functions are fully compatible with the TM-T88III and IV. These functions monitor the operation and status of the device and on demand report the number of line feeds, cuts and overall operating time. Using this data, the POS software informs the user, for example, which cash register is making the most sales, or when the device should be cleaned or the cutter exchanged. This minimises maintenance costs and avoids downtimes. The TM-T88V was developed especially for the POS area and with its extreme durability is a real bargain: in total cost of ownership (TCO) calculations, the receipt printer is significantly less expensive than any other low-priced printer. This, combined with its high compatibility, guarantees not only smooth integration of the device in existing environments without adaptation of the POS software, but in particular ensures long-term satisfied customers. And even if you plan to use the printer in other EU countries, you do not have to lose any sleep – the TM-T88V now already knows all languages.

EPSON®
EXCEED YOUR VISION

Epson TM-T88IV ReStick

- **Prints self-adhesive liner-free labels and receipts**
- **Available for 58 or 80 mm paper widths**
- **Prints direct thermal labels at up to 8 dots/mm (203 dpi)**
- **Complete TM-T88IV compatibility**

The TM-T88IV is a special direct thermal printer for creating self-adhesive labels. The reusable labels adhere to almost any surface and are easily removed without leaving a trace. Stay on top of things particularly in hectic surroundings such as gastronomy, retail, or logistics, and avoid mistakes, increase throughput and reduce costs.

Depending on the selected version, it prints in widths of 58 or 80 mm at a speed of up to 177 mm per second and a resolution of 8 dots/mm (203 dpi). The integrated auto-cutter produces labels in various lengths for almost any application and requirement. The professional »Liner-Free« labels are less expensive than normal labels and are immediately provided without liners, saving time, money and unnecessary waste. Along with the typical applications for »Liner-Free« labels, such as for information on products, shelf life, order, or ingredients, the TM-T88IV ReStick also prints receipts in the customary quality.

Epson TM-T20

- **Reliable direct thermal receipt printer including versatile features (drivers, cable, switch cover, etc.)**
- **Up to 150 mm/sec.; suitable for 80 mm and 58 mm wide paper**
- **Cost-efficient: ENERGY STAR certified**
- **Flexible mounting: integrated PSU, wall-mount included in scope of delivery**
- **Compatible with all common operating systems**

As a favourably priced direct thermal receipt printer, the Epson TM-T20 is predestined for companies requiring high quality and reliability. It prints sales receipts at up to 150 mm per second and produces logos and graphics with 8 dots/mm (203 dpi) in consistent high quality. In addition it produces both 80 mm as well as 58 mm wide receipts and can be perfectly placed vertically or horizontally to save space in retail, restaurants, and grocery stores.

Certified with the Energy Star rating, the compact direct thermal printer saves not only energy, but also significantly reduces costs while protecting the environment. The serial, USB or Ethernet interface and power supply are efficiently hidden in the compact housing. The scope of delivery includes all components, ensuring individualised and immediate operation. In terms of integration, compatibility with all standard operating systems leaves nothing to be desired. Finally, with a standard two-year warranty the printer offers Epson's proven high quality and reliability for long-term smooth operation.

Epson TM-T70

- **Fast and silent receipt printing at 170 mm/sec.**
- **Easy »Drop-in« paper handling: no more threading**
- **Prints pin sharp text, graphics and barcodes**
- **Space-saving: full integration capability due to complete frontal control**
- **Epson standard power supply unit connection**

The TM-T70 thermal printer produces 80 mm wide receipts at a speed of up to 170 mm per second. Its operation panel is located entirely on the front, thereby allowing the device to be installed under a table or into a counter to save space. All switches, keys and LEDs are arranged on the front side of the housing. The paper roll exchange is carried out in just one single hand movement. The receipt is issued from the front, which in most cases is more ergonomic for the user.

An optional cable covering protects the equipment against unauthorised access when the printer is being used on the table. An auto-cutter and a connection for two cash drawers are of course integrated into the TM-T70.

Information

Always your partner - for successfull business!

Jarltech is one of the largest European distributors in the POS and Auto-ID market. We offer a wide range of high quality hardware to resellers, system integrators, POS dealers and computer stores.

Jarltech is a pure distributor. Therefore, we sell exclusively to resellers. We value you as a software house and system integrator and believe that only you can do best to win the business for both of us.

As we do not offer solutions, nor software, nor setup or on-site service, we need your competence, knowledge and services to make our hardware running. Therefore, we never sell to end-users or industrial customers.

This means, we keep the channel clean so you can rely on the fact that we are always your partner for successful business.

If you have any questions, just call your account manager from our sales team free of charge!

EPSON®
EXCEED YOUR VISION

Epson TM-L90 rev. B

- **Compact, powerful label and receipt printer**
- **Top quality grayscale prints for attractive presentation**
- **Media width up to 80 mm**
- **Integrated auto cutter and optional peeler**
- **Simple connection via standard USB port**

The TM-L90 rev. B prints thermal labels and receipts at 150 mm per second with a resolution of 8 dots/mm at 203 dpi. Thanks to its attractive grayscale print it ensures for optically crisper results and an overall high quality appearance. This difference is particularly noticeable with logos and graphics.

For smooth operation and quick maintenance the TM-L90 rev. B features Epson's simple paper handling (»Drop-In«). Use various media formats with a width between 38 and 70, even 80 mm. Because of its integrated auto cutter you may also use the TM-L90 rev. B for endless labels. Optionally receive the TM-L90 rev. B with an integrated peeler function: a special mechanism automatically removes the label from the backing material after printing. Therefore, users save valuable time, plus the cumbersome process of removing labels from the label roll, especially when printing on demand applications. You install the thermal printer in a space-saving fashion either standing, lying flat or hanging it on the wall. The built-in USB port, as well as Universal Interface Board (UIB), simplify connection.

Epson TM-L500A Ticket

- **Compact, high-performance ticket printer**
- **Very high printing speed (250 mm/sec.)**
- **Prints and cuts tickets or labels of different sizes**
- **Sensor-driven paper recognition, prints on nearly any paper**
- **Low energy costs: Energy Star certified**

Are you looking for a ticket expert who convincingly masters any challenge in the event segment? Then look no further. The Epson TM-L500A Ticket is a high-performance, flexible thermal printer, capable of printing various admission tickets and ride tickets quick as lightning (250 mm/sec.). Thanks to its integrated auto cutter, it cleanly cuts them immediately after printing. Whether it is for events, public transportation, movie theatres or retail, the TM-L500A Ticket is designed for continuous operation. It handles different paper thicknesses and sizes up to 82 mm wide. Because it is sensor-driven, it recognises nearly any paper automatically, and delivers the quality you expect, whether it is fanfold or endless media. It also comes optional with an external roll holder.

With its compact size and sleek design, the TM-L500A Ticket optimally fits into nearly any environment, and is especially adept at integration into crammed areas. Its combo interface (USB and serial port) ensure simple and smooth communication with the existing system. The printer is certified with the Energy Star rating and will reduce your energy costs with its low consumption.

JARLTECH MARKETING-SERVICES

More Profit with the Jarltech Marketing Services!

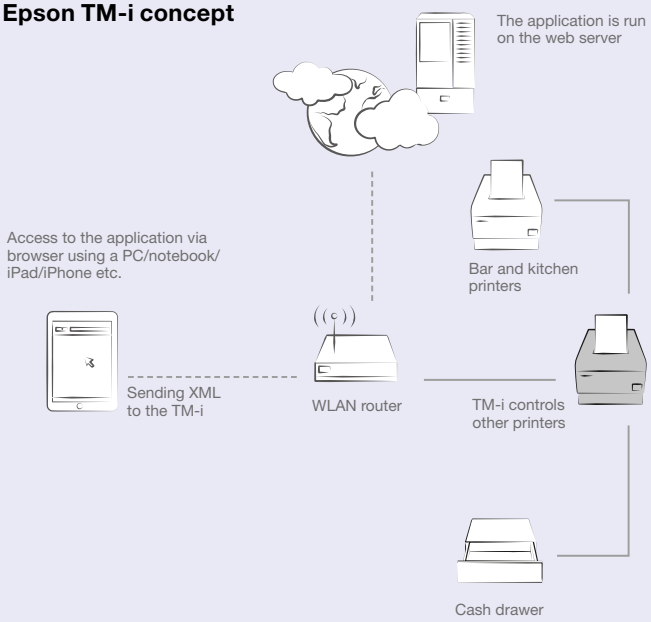
The manifold marketing services, we provide you with more opportunities to sell your solutions – all free of charge or at cost price:
Professionally edited media always helps to convince customers. As a reseller you receive a neutral PDF version of the latest catalogue without our Jarltech logo – of course free of charge. Presentations of our products are now possible in full context to all product descriptions yet without a trace of Jarltech. Alternatively, we design your very own catalogue based on the Jarltech catalogue – custom-tailored to your system solutions, in PDF, print layouts, even with printing and packaging. Please ask us for more information as well as for our useful Emailing Tool that helps you to copy and paste our texts and images into your own emails. Or get information about our marketing support that helps you with the planning and implementation of customer events, presentations and seminars.

WEB AND CLOUD-BASED POS APPLICATIONS

As market leader in the POS printer industry, Epson is constantly thinking up solutions which combine better service for customers with significant cost benefits for retailers or restaurateurs. One solution is the intelligent TM-i and TM-DT printer series.

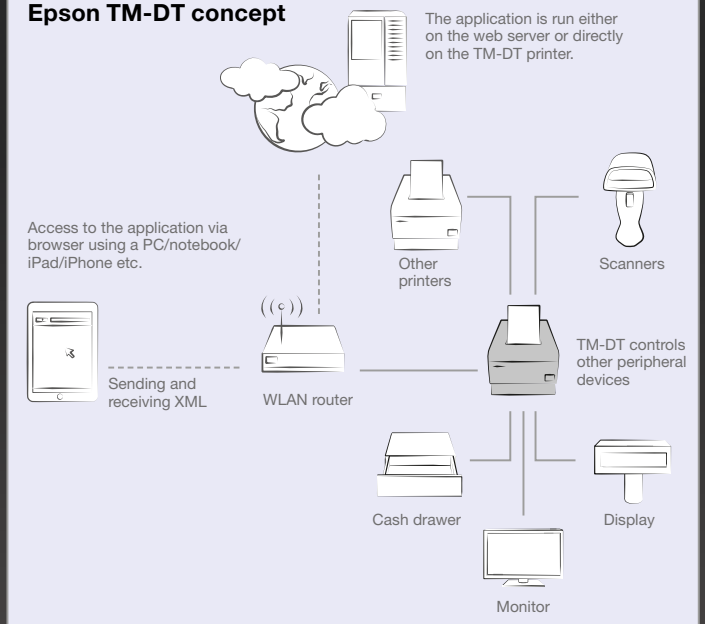
- Direct print from a tablet PC or smartphone
- Direct communication with all HTML5 compatible web browsers
- Driverless print without a PC or server, independent of the platform using the XML format (ePOS technology)

Epson TM-i concept



The application is run on the web server
Access to the application via browser using a PC/notebook/ iPad/iPhone etc.
Bar and kitchen printers
Sending XML to the TM-i
WLAN router
TM-i controls other printers
Cash drawer

Epson TM-DT concept



The application is run either on the web server or directly on the TM-DT printer.
Access to the application via browser using a PC/notebook/ iPad/iPhone etc.
Other printers
Scanners
Sending and receiving XML
WLAN router
TM-DT controls other peripheral devices
Cash drawer
Display
Monitor

Epson TM-i concept – direct print from mobile terminals

- Local printing or printing from the cloud
- Control of other Epson POS printers and connected cash drawers

Epson TM-DT concept – intelligent all-in-one POS solution

- All in one: printer, peripheral controller and web server
- Windows POSReady, integrated SQL server, processor and local memory (for local applications and backups)
- Control of other printers and numerous peripheral devices

EPSON®
EXCEED YOUR VISION

EPSON®
EXCEED YOUR VISION

Epson TM-T70-i

- **Thermal receipt printer with intelligent interface**
- **Prints receipts via XML simply from a web browser**
- **Works platform-independent and without drivers**
- **Space-saving under-counter mounting thanks to completely front-side handling**
- **Receipt width: 80 mm; print speed: 170 mm/sec.**

The thermal receipt printer Epson TM-T70-i acts through its built-in web server as an XML solution for mobile devices. It interprets XML commands of all common HTML5-compliant browsers, such as Firefox, Internet Explorer, Safari, etc. with the innovative technology ePOS-Print. Simply send orders in catering, hotel or retail from an internet or network-enabled tablet PC or smartphone – and the printer prints. The intermediate step of a PC is eliminated, thus avoiding the high cost of hardware and infrastructure.

Via the TM-T70-i, you also control a cash drawer or other printers, for example, to document orders received to the kitchen. Due to its complete front-side operation, it is also perfect for under-counter installation, saving valuable space. Even changing the paper roll requires only one hand movement at the front-side: just insert and go. The TM-T70-i prints receipts with a width of 80 mm pinpoint sharp and at a speed of 170 mm per second.

Epson TM-T88V-i

- **Intelligent printer with integrated web server**
- **Prints receipts simply from the web via XML**
- **Communication through mobile devices and any HTML5-capable browser**
- **Platform-independent and driverless operation**
- **Speedy greyscale receipt printing with 300 mm/sec., receipts of 58 and 80 mm**

Print sales receipts via XML markup language directly from a web application with the intelligent Epson receipt printer TM-T88V-i. The innovative ePOS print technology offers you numerous attractive options to simplify procedures in hospitality and retail: connect modern Cloud computing with mobility for order management and at the checkout. The TM-T88V-i interprets the XML commands of an HTML5-compatible browser thanks to its intelligent interface, without any PC having to ‚interpret' anything, saving costs for both hardware and infrastructure. Access the application via wired or wireless network, which is perfect for web-based applications.

With a printing speed of 300 mm/second, the TM-T88V-i produces 58 and 80 mm wide receipts in the blink of an eye. The quality is exceptionally good, and with a greyscale print of 7 points/mm (180 dpi) it enhances the receipts' optics, since it excellently displays logos, graphics and images. A two-year warranty makes this POS printer a long-term intelligent investment.

Epson TM-T88V-DT

- **All-in-one printing system with integrated processor**
- **POS printer, web server and peripheral controller in one**
- **Windows POSReady, SQL server and local memory integrated**
- **For driverless printing from tablets and smartphones**
- **Cost-saving: replaces PC and POS system**

Someone needs to collect: the Epson TM-T88V-DT is the first to cover all functions at the POS. With a built-in processor, web server and hub function, it not only works as a high-end POS printer, but also as a complete peripheral controller for additional printers, barcode scanners, cash drawers, etc. The printing unit is based on the successful model TM-T88V and delivers peak performance on a daily basis. Epson ePOS technology also makes it an intelligent printer that supports driverless printing from any mobile device via a web application with an HTML5-compatible browser.

The TM-T88V-DT is ideal for converting to a pure web environment. It contains an Intel Atom processor with up to 1.8 GHz, 4 GB RAM, plus a 16 GB SSD hard drive for back-ups of applications and databanks. It does not require a constant connection to a PC or POS system, thereby saving you both hardware and energy costs. Another advantage: even if the network connection is interrupted it continues to operate normally. Numerous interfaces ensure for easy integration into any POS.

Epson TM-L90-i

- **Thermal label printer with intelligent ePOS-Print technology**
- **Web server for driverless printing from mobile devices**
- **For label widths 37-70 mm and 80 mm**
- **Long-life auto cutter for up to 2 million cuts in receipt mode; up to 1 million in label mode**
- **Max. print speed: 150 mm/sec. at 203 dpi**

With the TM-L90-i retailers print variable labels up to 80 mm wide easily and without any printer drivers, from any common mobile device. Thanks to Epson's ePOS-Print technology and its integrated web server, it receives and interprets data directly from an HTML5-compatible web browser. It can even manage additional Epson POS printers and cash drawers in the network. A particularly practical feature is that you perform the configuration and maintenance comfortably via a web application. This saves you from needing a constant PC or server connection, thus effectively reducing your hardware needs for smooth operation - and at noticeably lower energy costs.

The performance data of the TM-L90-i is just as convincing as that of the basic version, the TM-L90: the maximum print speed of 150 mm per second at a resolution of 203 dpi (8 dots/mm) guarantees smooth work processes and a consistently high print quality. The standard integrated cutter is designed for up to 2 million cuts (receipts), giving it extreme longevity and reliability. The power supply comes with the delivery.

EPSON®
EXCEED YOUR VISION

Epson TM-T70II-DT

- **All-in-One printing terminal with integrated processor and web server**
- **For driverless printing directly from a browser**
- **Control numerous peripherals, such as keyboards, scanners, displays**
- **Fast: speed up to 250 mm/sec.**
- **Windows Embedded POSReady already pre-installed**

The Epson TM-T70II-DT is a direct thermal printing terminal in a compact form. Thanks to the integrated processor and Apache web server it acts as a printer, peripheral controller and POS system at the same time. It therefore assures driver-free printing from mobile devices directly from the browser. Also control additional receipt printers and peripherals, such as keyboards, scanners, magnetic card readers, displays and payment terminals directly or via the web. With an integrated 16 GB SSD memory it also increases reliability and guarantees you independence from network connections.

Perfectly designed for under the counter installation, the TM T70II-DT offers high splash water protection on the top. It also is entirely and easily operated from the front - from paper to exchange to receipt printing. Choose between the Intel Atom N processor with 1.6 GHz and 2 GB RAM, or the more powerful variant with 1.86 GHz and 4 GB RAM. When it comes to print quality, the TM-T70II-DT is ideally equipped: with 180 dpi at up to 250 mm/sec. it delivers crisp grayscale print results, even on logos and graphics.

Epson TM-P60II

- **Practical mobile printers for ePOS-Print print solutions (via Wi-Fi)**
- **Variants for receipts or labels (TM-P60II Peeler)**
- **Print directly from a browser via XML**
- **No driver installation and updates necessary**
- **Fast communication via Wi-Fi or Bluetooth**

Never install a driver again – this is reality with the Epson TM-P60II printers. Thanks to Epson's ePOS Print technology you print from any mobile device (such as a Smartphone, tablet or MDC) directly from a browser, independent of the operating system. ePOS Print receives XML commands from any HTML5-compatible browser. It could not be easier! Connection between the two devices occurs via the integrated 802.11 a/b/g/n Wi-Fi. If you need a wireless mobile printer without ePOS Print technology, choose the variant with Bluetooth.

Print paper receipts or tickets at 100 mm/sec. Epson offers variants for both media types, to cover a wider field of application. The TM-P60II for receipts is optimal for hospitality; the label printer TM-P60II Peeler is better suited for retail. Plus an extra handy feature: to save you time and simplify handling while wearing gloves, it automatically separates the labels from the backing material. It ensures for adequate print quality with a resolution of 203 dpi (8 dots/mm).

Epson TM-H5000II

- **Hybrid printer for thermal receipts and standard paper vouchers**
- **Voucher print up to 150 mm/sec. on 80 mm thermal paper**
- **Prints vouchers on standard paper**
- **Fast printout at a low noise level**
- **Standard connector for Epson power supply**

The TM-H5000II combines a copy-capable dot matrix printer (one original and four copies) with fast and silent thermal printing for vouchers, meeting the highest demands in all areas of trade and service.

Among others, the high reliability and durability is particularly displayed in the longevity of the automatic cutter (1.5 million cuts). The »drop-in« principle for fast paper roll exchange, combined with the high printing speed of 28.4 lines per second, ensures extremely high productivity even during peak hours. Despite its high speed, the TM-H5000II belongs to the range of more silent printers.

For easy integration, the TM-H5000II of course offers an interface for automatically opening the cash drawer, as well as a space-saving mounting option for a customer display of the Epson DM-D series.

Epson TM-H6000IV

- **Multi-station printer for receipts and vouchers (i.e. cheques, prescriptions, etc.)**
- **Rapid thermal printing (up to 300 mm/sec.)**
- **Professional printing of receipts in greyscale**
- **Leading MICR precision of more than 99%**
- **USB standard on board; RS232, parallel, Ethernet and Wi-Fi optional**

The Epson TM-H6000 IV is a high-performance, compact multi-station printer for receipts and vouchers in highly frequented surroundings. It combines the rapid thermal printing of up to 300 mm/sec. for receipts with the professional dot matrix printing for vouchers, checks, prescriptions, etc. It prints logos and graphics in greyscale using the direct thermal method. The results come across even more professional, and experience has shown it to generate more advertising for additional sales. The printer's handling and installation has also been simplified: load paper in the drop-in tray, enjoy the standard USB interface; RS232, parallel or Ethernet or Wi-Fi interfaces are optionally available.

Increase your efficiency and think about your costs! The TM-H6000 IV holds a MICR guarantee of more than 99%, the leading in its segment. Cheques are read with absolute accuracy. Plus, thanks to its Energy Star rating, both energy and paper consumption have been reduced to a minimum.

ON-DEMAND COST EFFECTIVE COLOUR LABELS

Print your own custom colour labels, tickets and tags with the Epson TM-C3500

The Epson TM-C3500 brings high-quality colour and on-demand versatility to your labels, tags and tickets. This all-round colour label printer also helps you conform to GHS international chemical labelling guidelines, as its pigment ink in combination with the PE Matte Label media are ideal for use in harsh environments, providing accurate and smudge proof printouts, resistant to water and most chemicals. Featuring high-quality print speeds of up to 103mm/sec and individual pigment ink cartridges, your business will save time and money on outsourcing label production.

EPSON®
EXCEED YOUR VISION

Epson TM-C3400

- **Fast inkjet colour label printer**
- **Media width from 30 to 112 mm, printing width from 20 to 104 mm**
- **Prints up to 1,000 labels per hour and up to 7,500 labels per cartridge**
- **Wide range of media: perforated labels, wristbands, tickets, continuous paper and labels**
- **Complete kit: with auto cutter and integrated power supply unit, USB or Ethernet interface**

Whether for warnings on packages, colour codes on component parts, coloured notes in patient charts or personalised tickets and wristbands: colour helps to highlight important information, facilitate intuitive understanding, optimise working processes and prevent mistakes. With the Epson TM-C3400 colour label printer, you will now be able to easily produce such important labels yourself. This fast multi-talent is able to process a wide range of formats, materials and surfaces while keeping costs low. The special ink is guaranteed to be durable and smudge-proof.

The TM-C3400 suits applications in retail, medical engineering and production, or any field where small numbers of high-quality labels are needed. Producing these yourself is often a much more cost-effective solution than buying pre-printed products. The Epson TM-C3400 is an economic and versatile printer, as it is able to process labels, wristbands, tickets, and continuous and pre-cut paper with a width of 30 to 112 mm (printing width from 20 to 104 mm).

Epson TM-C3500

- **Inkjet printer for on-demand colour labels**
- **Cost-saving: 4 separate colour cartridges**
- **Fast drying, smear and waterproof results**
- **Flexible choice of media: matte, glossy, film-coated, etc.**
- **Simple connection via USB or Ethernet port**

A high degree of flexibility for minimal costs: the desktop label printer TM-C3500 from Epson is an inkjet printer for in-housing printing of colour labels on demand. Meet the ideal demands for materials to be produced short-term, or for printing on pre-fabricated labels. The TM-C3500 is designed for various matte, glossy and film-coated labels, tickets and price tags with a width of 30 to 112 mm. Thanks to its four separate colour cartridges it prints especially economically.

Optimal print results at 103 mm/sec. at 360 dpi are ensured by Epson's long-lasting DuraBrite Ultra pigment ink, which easily resists water and moist wiping. The TM-C3500 is particularly user-friendly: it contains an LCD display, which provides continuous print and ink status, and it is operable entirely from the front. Thus, placing it under the table or on a shelf is possible. Connect the TM-C3500 easily via USB interface, or turn it into a network printer via Ethernet interface.

Epson TM-C3400BK

- **Inkjet printer for flexible printing of labels, tags and wristbands**
- **High-quality monochrome prints, even greyscale**
- **Complete front-side operation, USB or Ethernet connection**
- **Epson DURABrite ink for years of durability, water and light resistant**
- **Maximum medium width: 112 mm**

Epson developed the TM-C3400BK inkjet printer for all applications where high-quality monochrome labels, tags and wristbands are needed. It prints text, logos, pictures and prevalent barcode standards in black or detailed greyscale. Fall back on various media with a width of 30 to 112 mm. The TM-C3400BK is optimally suited for quick printing of pre-fabricated labels directly on-site – in large or small quantities, and entirely according to current needs.

The Epson DURABrite ink boasts excellent properties: it is waterproof, resists many cleaners and is highly durable, depending on its storage, allowing for outdoor usage or in direct sunlight. All of the operating elements of the TM-C3400 have been included on the front of the TM-C3400BK, for mounting under the counter or on a shelf. For simple integration, USB and Ethernet connections are at your disposal, the power supply is integrated.

Epson TM-C3400-LT

- **Stand-alone colour inkjet printer for labels, tickets and wristbands**
- **Cost-effective thanks to on demand printing**
- **Integrated touch display for easy handling**
- **DURABrite ink for extra durable and water-resistant prints**
- **No PC necessary, operating system already pre-installed**

Print colour labels, tickets and wristbands on demand on-site – no problem for the label printing terminal TM-C3400-LT from Epson. The main advantage of this multi-faceted version is its large touch display, which guarantees its independent, stand-alone operation. As needed, connect peripherals such as a scanner, keyboard or mouse easily via USB. The display is dirt and moisture-resistant, can be tilted up to 90° and ensures for top readability at all times. Precise operational features and a quick reaction time make working with this printer terminal easier.

The TM-C3400-LT prints non-fade results with its water-resistant and smudge-proof DURABrite Ultra pigment ink. Liquids and rough storage conditions are no obstacle for this printer: the print results are reliable and are also readable over long periods of time, even in highly demanding areas. The terminal scores with its small size and comfortable operating height. It is also robust and IP5X-certified (protected against dust). Included in the delivery are an ink cartridge and a label roll.

EPSON®
EXCEED YOUR VISION

Epson TM-J7000/7100

- **Multi-station ink printer for vouchers and receipts (e.g. checks, prescriptions)**
- **Special ink: immediately water-repellent and smudge-resistant, no fading of colours**
- **Very high speed (up to 43 mm/sec.)**
- **Also suitable for barcodes and graphics**
- **Epson standard power supply connection**

On the one hand, the printers of the TM-J7000 series can be fed single-sheet receipts at up to a size of 68 x 230 mm, such as for example prescriptions, receipts, etc. On the other hand, they print vouchers up to a width of 82.5 mm using ink jet technology. They are perfectly suited for use in pharmacies and other trade areas in which printing of receipts as well as sales slips are required.

The monochromatic TM-J7000 version produces two different kinds of records: standard paper receipts as a customary receipt printer as well as external vouchers, such as receipts and prescriptions, which are inserted in and printed on the front side. A fast printing speed of up to 43 mm per second and the low-noise inkjet procedure guarantee a pleasant working environment and satisfied customers. Due to the patented Epson SEA-Jet procedure, the records are produced almost noiselessly. The ink, which has been specially developed for the POS area, already dries during the production of the voucher and is immediately completely water-repellent and indelible: even if the records get wet, the ink does not blur. The print-out lasts for years and is high-contrast. The voluminous ink cartridge of the TM-J7000 makes exchanging the cartridge necessary only after a maximum of 20 million characters. This corresponds more or less to the capacity of 6 ink ribbons in the dot matrix process. Long printing without interruption and extreme low running costs (TCO) are the positive effects of the inkjet technology.

The TM-J7000/7100er series has a connection for two cash drawers and the simple »drop-in« paper handling. The voucher roll width can be set variably in four different sizes (57.5; 69.5; 76.0 and 82.5mm).

The multi-station printer TM-J7100 has the same characteristics as its sister model TM-J7000, but it produces receipts and records in two colours. In this case there is a choice of contrasting colour variations like black/red.

The coloured highlighting of special hints/tips makes the voucher an effective means for customer relationship management. Design vouchers with coloured logos or even images and by doing so, you additionally use the voucher as a trading stamp, collectable loyalty bonus, or as advertising media for special promotional activities.

Epson TM-J7500

- **Multi-station ink printer for receipts and larger vouchers (e.g. cheques, prescriptions)**
- **Special ink: immediately water repellent and indelible, no fading of colours**
- **Very high velocity (up to 43 mm/sec.)**
- **Also suitable for bar codes and graphics**
- **220V power supply unit with space-saving integration option**

This multi-station printer produces two different types of records: standard paper vouchers as a customary voucher printer, as well as external records, such as receipts or prescriptions that are taken in and printed on the front (max. size 68x297 mm).

For both printouts the TM-J7500 uses the patented Epson SEA-Jet ink jet procedure. This makes printing particularly silent. Printouts lasts for many years and are highly contrasted. The long-loasting ink cartridge requires chainging only after 20 million characters. The TM-J7500 also has a connection for two cash drawers and the »drop-in« paper handling.

Epson TM-J7600

- **Multi-station ink printer for vouchers and larger vouchers (e.g. cheques, prescriptions)**
- **Prints in two colours**
- **Special ink: immediately water-repellent and indelible, no fading of colours**
- **Very high velocity (up to 43 lines/sec.)**
- **Also suitable for barcodes and graphics**

Similar to the TM-J7500, the TM-J7600 unites fast voucher printing with the lasting printing of records and receipts by using the ink jet process. However, the TM-J7600 additionally prints vouchers and records in two colours.

Inkjet cartridges are available for the colour combinations black/red, black/blue or black/green. As with all Epson cash register printers, it contains a connection for two cash drawers and the »drop-in« paper handling.

JARLTECH MARKETING-SERVICES

More Profit with the Jarltech Marketing Services!

The manifold marketing services, we provide you with more opportunities to sell your solutions – all free of charge or at cost price:
Professionally edited media always helps to convince customers. As a reseller you receive a neutral PDF version of the latest catalogue without our Jarltech logo – of course free of charge. Presentations of our products are now possible in full context to all product descriptions yet without a trace of Jarltech. Alternatively, we design your very own catalogue based on the Jarltech catalogue – custom-tailored to your system solutions, in PDF, print layouts, even with printing and packaging. Please ask us for more information as well as for our useful Emailing Tool that helps you to copy and paste our texts and images into your own emails. Or get information about our marketing support that helps you with the planning and implementation of customer events, presentations and seminars.

SMART PRINTING FOR BUSINESSES ON THE MOVE

SET YOUR BUSINESS FREE WITH THE EPSON TM-P60II AND TM-P60II PEELER

The Epson TM-P60II Series offers a brilliantly simple receipt and label printing solution. With Epson's unique built-in intelligence, ePOS-Print, users can print directly from web browsers without the need to install additional drivers. Its intuitive features take advantage of hand-held wireless, mobile printing technology to aid queue busting, order taking and shelf-edge labelling, helping to serve customers quickly and efficiently. Reliability is assured thanks to the unit's rugged casing, paper loading and long battery life.

EPSON®
EXCEED YOUR VISION

Epson TM-U220

- **Favourably priced, proven and robust dot-matrix printer from the market leader for POS printers**
- **Fast dot-matrix printing at up to 6 lines per second**
- **Graphics and logo memory for the individual design of receipts**
- **For 57.5, 69.5 or 76.0 mm wide standard paper rolls**
- **220V power supply unit included in delivery**
- **Auto-cutter integrated**

The 200 series of dot matrix printers by Epson was established years ago as the de-facto worldwide standard for the POS segment and is supported by almost every software package. The current version TM-U220 has once again been revised and optimised. It the result of Epson's decade-long experience as market leader in the field of cash register printers. Three different versions (A, B and D) offer the right equipment for every application. Version A is equipped with an automatic cutter and take-up spool for the carbon copy. Version B has an automatic cutter and can be attached to walls if required. Version D is the financially most appealing version with a tear-off edge for the receipt. According to the area the printer is being used in – be it gastronomy, hotel, specialized and retailer trade or administration – simply select the version that best suits your individual needs.

All three versions print receipts on standard paper at the high speed of 6 lines per second. While the predecessor model TM-U210 was only compatible with one paper width, the TM-U220 processes three different widths: 57.5, 69.5 and 76.0 mm. This means not only more flexibility for the user, but also cost savings, since narrower rolls are respectively cheaper.

When it comes to printing receipts at the cashpoint, speed counts the most. That is why Epson has increased the speed as well as the performance of the printers even further. With a paper width of 76.0 mm and 40 characters per line, the TM-U220 prints at a speed of 4.7 lines per second; with 30 characters per line this equalss up to 6.0 lines per second. Thanks to the simple paper handling, the receipt roll is exchanged within seconds using only one hand.

A wall fixation is optionally available for the TM-U220B – a crucial advantage when the space at the POS is limited or the printer is being used in gastronomy. Attached to a kitchen wall, the TM-U220B fits harmoniuosly for example into the kitchen surrounding and leaves space for the cooks' trade.

The paper cutter of the TM-U220B offers two options: according to the requirements, the user selects between »full cut« and the »one-point-left cut«. While the former neatly separates the entire receipt, the latter does not cut the receipt entirely off the roll, so that it still remains connected to it. This feature offers advantages mostly in those areas of commerce where the customer in general does not want to take the receipt, or also in the context of a kitchen printer.

As with the TM-U210, the TM-U220 prints the receipt optionally in two colours, black and red. Logos or special offers are thus highlighted effectively. In this way you generate receipt with surplus value and save costs for additional marketing actions, such as flyers or printed trading stamps. Last but not least, the TM-U220 offer two data memories: the user's memory of 8 KB and the logo memory of 128 KB for more rapid printing of logos and graphics.

The compatibility with older models is ensured with the TM-U220 as well: you can easily replace the TM-U210 by its successor, without having to adapt the POS software to the new receipt printer. The extensive selection of interfaces guarantees simple integration into every existing system. The appropriate power supply unit is included in the delivery package of the TM-U220 and can be integrated on demand into the casing without wasting much space.

EPSON®
EXCEED YOUR VISION

Epson TM-U220D

- **Favourably priced and robust dot matrix printer series**
- **Fast dot-matrix printing with up to 6 lines per second**
- **Graphics and logo memory for individual receipts**
- **For 58.5, 69.5 or 76 mm wide standard paper rolls**
- **220V power supply unit included in delivery**

The TM-U220D is the financially most favourable version of the 220er series. It prints standard paper receipts with a width of up to 76 mm and a velocity of up to 6 lines per second. It contains a tear-off edge for the slips and is downward-compatible with the TM-U210 series.

The TM-U220D provides you with particularly simple paper handling without much threading, as well as a cash drawer connection. The suitable power supply unit is included in the delivery.

Epson TM-U220A

- **Favourably priced and robust dot-matrix printer series**
- **Fast dot-matrix print with up to 6 lines per second**
- **With take-up spool for cash register journal**
- **Graphics and logo memory for the individual voucher print**
- **For 58.5, 69.5 or 76 mm wide standard paper rolls**

In the same way as the TM-U220B, the A version of the dot-matrix printer creates cash register receipts with a width of up to 76 mm. Additionally, you will find a take-up spool for the cash register journal in this version. This function requires self-copying, two-ply receipt paper, from which the copy is rewound within the printer.

As many other Epson printers, the TM-U220A also features very simple paper handling, as well as an automatic paper cutter and a cash drawer connection. All TM-U220 are downward-compatible with the Epson TM-U210. The suitable power supply is included in the delivery package.

Epson TM-U950II

- **Multi-station printer for receipts, records and cash register journals**
- **Dot matrix print: fast and economical**
- **Integrated rewinder spool for journals**
- **Printing speed: 311 characters/sec.**
- **Record and journal print on standard paper using the dot matrix print method, 70 mm receipt width**

The TM-U950 is three devices in one:
use it for receipt, records or log printing – the TM-U950 is one of the most compact and most popular POS printers. Above-average reliability is the major advantage of this powerful device. It is also particularly user-friendly and has been used successfully for years in chemists' shops and retail.

Its user-friendly concept becomes apparent during daily operation: easy access of paper rolls and ribbons, automatic receipt entry and a clearly arranged control panel. The integrated auto cutter provides perfectly cut receipts – accumulated paper dust is also a thing of the past. Dirt is prevented easily and failures are practically non-existent, as its high MCBF value of 18 million characters proves.

One reason for its exceptional reliability is the integrated auto-status-back function that makes checks and indication of the current printer and paper status possible. Different sensors locate the source of the problem while the intelligent design of its housing and mechanisms allows users to solve them on their own.

High printing performance and low power consumption result in extremely low operating costs (TCO), making the TM-U950 one of the most effective POS printers. Printouts convince users with their clear typeface, even when printing multiple forms. In the medical field and for accounting applications the TM-U950 is even capable of printing receipts with up to four carbon copies. Furthermore, the printer can prepare a cash register log and winds it up automatically.

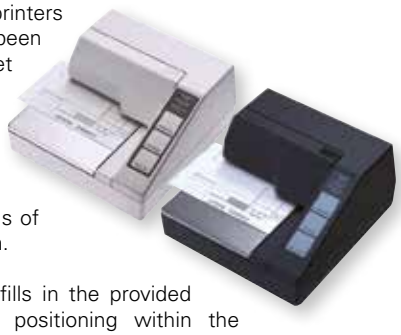
Space-saving and versatile characteristics: a compact design with all necessary functions that a POS printer needs. Connectivity options include a parallel and a serial interface, standard interfaces for up to two cash drawers, software support for optional customer displays and direct connection of a display for the serial interface version.

The TM-U950 supports the ESC/POS command set industry standard. Besides simple and complex printer commands, extra functions provide further data security that is essential at checkouts. OPOS drivers from Epson offer high flexibility and performance for developing custom software applications.

EPSON®
EXCEED YOUR VISION

Epson TM-U295

- **One of the smallest cheque and receipt printers**
- **Powerful shuttle matrix print: one original and two copies**
- **Up to 2.1 lines/sec.**
- **Hundred-thousandfold proven version by the market leader**
- **Epson standard power supply connection**



The TM-U295 is one of the smallest cheque and record printers and for many years has been established on the market as a reliable and durable product. The compact printer processes single sheets of paper like cheques, records, receipts and prescriptions of a size up to 182x257 mm.

The TM-U295 precisely fills in the provided fields using pixel-exact positioning within the defined pages. Moreover, the page mode supports a page memory that makes it possible to exactly position the individual print elements (text or graphics) in the printer's memory and to activate the printout only after the complete design of the page. Furthermore, the printer can control two cash drawers, check the printer and paper status, as well as issue the records either on the front or on the back side.

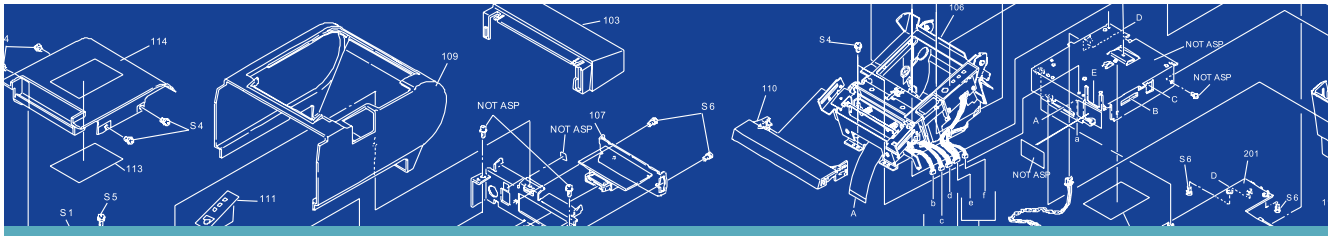
Epson TM-U590

- **Fast record printer up to DIN A4**
- **Dot matrix print for max. 4 copies**
- **Small and practical casing**
- **Simple colour ribbon replacement**

The TM-U590 is a flatbed receipt printer for different types of records and forms. Using the dot matrix method it processes records of up to 5 layers in the size of DIN A4 (printing width 135.5 mm). Thus, it is ideally suited for trade, gastronomy as well as offices and administrations.

All records are printed bi-directionally with logical printhead positioning and a speed of up to 311 characters per second. The printer provides all functions for development of complex office solutions, e.g. for high-precision positioning of the printhead, overhead printing, printing of graphics and user-defined signs, etc. The mechanics and all functions of the TM-U590 are also part of the TM-H5000II, which, as a hybrid printer, also has a rapid thermal receipt printer. The TM-U590 also supports the well-known ESC/POS code.

Epson makes drivers available for program development, offering you high flexibility and efficiency for your own software development.



Epson Service-Center

- **Official Epson Service-Centre for all of Europe**
- **No more waiting: guaranteed repair or replacement overnight!**
- **For repairs under warranty, or not under warranty**
- **Officially certified repair team**
- **Massive replacement warehouse**

Our official Epson Service-Centre offers you and your customers many advantages. We are the first distributor in Germany who has received Epson certification, which allows us to conduct in-house repairs for products under warranty. For you this means an enormous speed advantage: in our service shop we repair all types of Epson POS printers overnight! As customers do not want to do without a device under warranty for long, we immediately repair or replace it with an equivalent unit. We guarantee that a functioning device will be sent to you or your customer within 24 hours after receipt. In this regard, it is by the way completely insignificant where the good was purchased. Our service technicians are trained by Epson and take part in regular training sessions in order to keep their technical expertise up to date.

Along with repairs under warranty, we of course also repair devices not under manufacturer warranty. Often even a small defect or just simple wear leads to a printer breakdown. Epson products are especially developed for yearlong use in tough surroundings. In most cases repair is also possible outside of the warranty and is especially economically sensible. At favourable prices we will repair all Epson devices from the POS printer series for you and your customers, even if the manufacturer warranty has already expired. Our massive replacement parts warehouse and our experienced personnel ensure swift and skilled handling of your order. If you conduct the repair yourself, you will immediately find over 30,000 replacement parts online in our replacement parts store. (See below for more information)

Thanks to our official Epson Service-Centre, we are generally much faster than other distributors who need to send the products back to Epson for repair and who possibly do not accept them at all after the warranty period has expired.

Epson Service Center

EPSON®
EXCEED YOUR VISION

Epson Interfaces

- **Original Epson interfaces**
- **Subsequent replacement also possible**
- **For almost all TM printers**

All Epson TM printers (exceptions see below) have a replaceable interface board. Instead of the connections listed in the print description, printers with one of the following interfaces are also available. In such a case, please order the serial printer together with one of the below listed interface options.

To use the printer without a power supply unit, please order the powered USB interface. Special data cables with an integrated 24 volt power supply must also be ordered (see below).

All printers can be subsequently retrofitted. The interfaces of the TM-U950, TM-U295, TM-P60, TM-L60 and TM-C100 are not exchangeable.

Information

Always your partner - for successfull business!

Jarltech is one of the largest European distributors in the POS and Auto-ID market. We offer a wide range of high quality hardware to resellers, system integrators, POS dealers and computer stores.

Jarltech is a pure distributor. Therefore, we sell exclusively to resellers. We value you as a software house and system integrator and believe that only you can do best to win the business for both of us.

As we do not offer solutions, nor software, nor setup or on-site service, we need your competence, knowledge and services to make our hardware running. Therefore, we never sell to end-users or industrial customers.

This means, we keep the channel clean so you can rely on the fact that we are always your partner for successful business.

If you have any questions, just call your account manager from our sales team free of charge!

Cables for Epson Printers

- **Black or white available**
- **High-quality shielding**
- **Available in two lengths**

Our null modem cables are used as serial data cables and carry a 25 pin male SUB-D plug and a 9 pin female plug. The parallel data cables use 25 pin male SUB-D plug and a 36 pin Centronics connector.

These cables are for connecting the receipt printer to the parallel or serial interface of your PC. With our special 5 metre data cables you can achieve a significantly higher flexibility when placing your devices. Both standard lengths (1.8 and 5 m) are available in black or white, so you can order them according to the colour of your printer.

As cash desks often require space, we also provide extra long cables. You can order further data cables and power cords of 5 metres length.

Epson DM-D110

- **Bright vacuum fluorescent display**
- **2x20 characters, 5 mm character size**
- **Readable from every angle**
- **Swivel-mounted display head**

The Epson DM-D110 display is a modern customer display designed for the shop counter. It presents 2x20 shining green characters against a black background. Due to its good readability, eye-pleasing presentation, as well as the compact casing, the display ensures smooth customer interaction in every shop.

Intelligent programming offers a wide range of functions for the POS. It is possible, for example, to preset information scroll texts for the customers that appear after a certain time of inactivity. It goes without saying that the display also correctly presents special characters like the euro symbol and others. The display is controlled directly from the POS sofware using the very common ESC/POS commands via the serial or USB interface (OPOS optional). The Epson DM-D displays are used worldwide a hundred-thousand times and meet the highest demands for quality and reliability.

EPSON®
EXCEED YOUR VISION

Epson DM-D210

- **Bright vacuum fluorescent display**
- **2x20 characters, 11 mm character size**
- **Good visibility due to elevated display head**
- **Readable from every angle**
- **Swivel-mounted display head**

The display head of the Epson DM-D210 customer display is placed on an elevated position, on top of a 45 cm long stem. It presents 2x20 shining green characters against a black background that, with a size of 11 mm, are well visible even from greater distances.

The DM-D210 also offers extensive programming and setting options as e.g. the slow fade-in and fade-out of characters, ticker texts, twinkling, etc. The worldwide-spread ESC/POS command of the display makes integration into the cash register software easy, since many manufacturers support this command set (OPOS optional).

Epson DM-D Series

- **Versions for mounting onto Epson printers or POS systems**
- **Luminous vacuum fluorescent displays**
- **Well visible through raised display head**
- **Readable from every angle**
- **Pivotable and swivelable display head**

All Epson DM-D customer displays are also available for direct mounting onto Epson POS printers or Epson POS systems. They distinguish themselves from the standard versions through specially fitted mountings.

All displays also have a special connection cable for direct connections, which is the same on all printer types (serial or USB). Please choose the version that best fits your printer or POS system.

Epson

JARLTECH ONE-CLICK SERVICE

Special Service for Additional Security

Buy more safety for your company and your customers: For an extra charge you acquire almost all of our products with **a full three year manufacturer independent warranty.** Additionally, Jarltech offers you optional **pre-exchange service:** If the device fails within the warranty period, we immediately send a replacement to you. After receiving the replacement, you simply send back the defective device. The service is valid for the whole warranty period, even for extended warranties.
Pre-exchange service and **extended warranties** can be combined freely. Order both services over the telephone or with a click from our Jarltech webshop.

NOTES

DATALOGIC

- **Reliable handheld scanners with laser, CMOS or CCD engine**
- **Scanners for installation and fixed mounted applications**
- **Barcode terminals and PDAs for mobile data capture**

The inventor of the barcode offers an extensive range of barcode scanners and mobile terminals for retail, production and logistics. Their high-quality hardware is not only robust, but satisfies all demands for flexibility and performance.

Honeywell

- **Professional laser scanners for handheld and stationary use**
- **CMOS imagers and extremely fast 2D scanners**
- **Mobile data collection devices with and without Windows**

Honeywell Scanning and Mobility unites the brands Metrologic, Handheld Products and LXE. As an official Honeywell distributor, we offer you the complete product line of handheld scanners, installation scanners and robust mobile terminals.

MOTOROLA SOLUTIONS

- **Handheld scanners for POS and office applications**
- **Robust scanners for industry and production**
- **Mobile terminals and powerful Wi-Fi infrastructure**

Motorola is the market leader in scanning and mobility solutions and is used especially by large companies worldwide. At Jarltech, you receive the complete Motorola portfolio: barcode scanners, mobile terminals and Wi-Fi products.

Getac

- **Semi and fully rugged notebooks for field work, industry and construction**
- **State-of-the-art technologies, customisable and certified**
- **Extremely robust handheld terminals for high demands**

For more than 20 years now, Getac has been producing and distributing highly robust PC and handheld components for the most demanding use in military, police, industrial and production applications. Their hardware uses the latest technologies and fulfils the strictest security standards.

METAPACE

- **Reliable and affordable POS peripherals**
- **Robust printers, scanners, etc. for retail and warehouse**
- **Complete package including all accessories for immediate use**

Metapace is the brand for cost-conscious markets, yet it offers great reliability in all areas. Along with outstanding technical performance, it features delivery of complete packages, which ensure immediate installation, even by beginners.

EPSON

EXCEED YOUR VISION

- **Receipt, multi-station and mobile printers**
- **Ticket, receipt and label printers for monochrome or coloured prints**
- **Intelligent Cloud printing technology for the POS**

The leader in the receipt printer market offers a vast range of POS printers, specialised printers as well as Wi-Fi print solutions for almost every application. Jarltech is an official Epson Repair Center.

CITIZEN

Micro HumanTech

- **POS direct thermal and dot matrix printers**
- **Label and ticket printers for desktop/midrange applications**
- **Mobile label printers for catering and field work**

Known for reliable and impressive products, Citizen has been producing printers for POS and barcode applications for many years. Clever features, as well as long durability, guarantee professional results in point of sale and warehouse areas.

ZEBRA TECHNOLOGIES

SEE MORE. DO MORE.

- **Label and card printers for office and retail applications**
- **Industrial plus portable label and receipt printers**
- **High-quality consumables for all applications**

Globally, Zebra is the leading label and barcode printer manufacturer. Their unrivalled product range of robust label and card printers serves all major companies worldwide in logistics, production and retail.

GLANCETRON

- **Touch monitors in various forms and sizes**
- **All-in-one POS systems with integrated PC**
- **Special touch screen hardware for individual demands**

Glancetron offers an extremely broad selection of touch monitors (from 7" to 22"), as well as high quality, compact POS systems. For hard-wearing and aggressively priced POS devices, Glancetron is the right choice.

Colormetrics

- **High-quality POS systems with integrated touch screen**
- **Optically appealing high-performance systems**
- **Robust, resistant aluminium housing**

Colormetrics is a Taiwanese manufacturer of especially high-quality and elegant POS systems. The touch systems impress with their top performance and a large number of easy-to-integrate peripheral devices.

elo TOUCH SOLUTIONS

- **Touchmonitors with a large choice of technologies**
- **Touchscreen POS systems with integrated PC**
- **Certified touchscreens for medical applications**

As the inventor of the touchscreen, Elo Touch Solutions has a great influence on the touchscreen market and keeps developing this technology further. These high-quality monitors and systems with integrated PCs are renowned for their robustness and reliability.

Panasonic ideas for life

- **Touch screen systems for retail and catering**
- **Ultra-silent and reliable complete POS systems**
- **Top hardware solutions in brilliant designs**

State-of-the-art technology through years of experience, and a large selection of hardware make the brand name manufacturer the right choice for your customers. Jarltech is an official distributor for Panasonic touch screen POS systems.

PrehKeyTec

- **Cash register keyboards for various applications**
- **Programmable PC keyboards with alternative layouts**
- **Professional LCD monitors with integrated touch screen**

PrehKeyTec is one of the major manufacturers of cash register and special-purpose keyboards for various applications. Preh Key Tec produces keyboards with different amounts of keys that have been used for decades in retail and production.

Addimat

- **Waiter locks for automatic identification**
- **Key readers for industrial applications**
- **Keys in diverse trendy colours**

Addimat produces and sells professional complete catering and bar service systems. The Addimat waiter and pen locks offered by Jarltech are popular with personnel and management alike for their security, simple operation and robustness.

IDENTIVE

- **Smart card readers / writers for various standards**
- **Offline and online time recording systems with professional software**
- **Electronic signature applications and security software**

Identive is known as the inventor of the PCMCIA standard and offers a large product range related to smart cards, time recording and contactless data collection. Identive's market leading position has become even stronger since the acquisition of Towitoko.

PROMAG™

- **RFID readers and writers / modules for installation**
- **Professional devices for time recording and access control**
- **Extensive range of RFID transponders and accessories**

Promag offers a huge range of devices that read and process RFID tags and labels together with time recording and access control systems. For you, Jarltech offers Promag fixed-installation modules, portable readers and tags in various shapes and formats.

ratiotec

We support retail

- **Bank note testing devices for the POS**
- **Bank note counting machines for commerce and banks**
- **Professional change sorting and counting devices**

The certified ratiotec devices provide additional security and higher efficiency in retail. At Jarltech, you get all of the German brand manufacturer's testing, counting and sorting machines for change and notes of different currencies directly from stock.
